## **AI Consultation Service**

Generative AI is changing the face of work. This explosive technology is creating seismic shifts in the workforce while simultaneously offering opportunities for massive growth and efficiency for businesses. State and local governments are scrambling to regulate the AI space while Employers seek to incorporate AI into day-to-day workflows-- as well as the hiring, retention, discipline, and termination processes.

We can help you navigate this shifting landscape with advice tailored to your business. Every workplace is unique. Our team will work with you to identify potential opportunities and risks in using AI tools in your work and HR processes, as well as risks AI may pose to your intellectual property and data security. We can also provide you with AI use and disclosure policies to establish guidelines for AI use in the workplace and to meet regulatory requirements coming into effect.

The service begins with the *AI in the Workplace Guided Assessment*. This is a questionnaire to be completed by your team and returned to ours. Once completed, our team will review your responses and schedule a meeting with an attorney from our team to consult on implementing AI in your workplace.

At the conclusion of the consultation, you will receive:

- Our model AI Acceptable Use Policy, tailored to your workplace;
- Our model AI and Employment Decisions Policy;
- An AI FAQ for Employers; and
- An AI FAQ for Employees.

We can help. Please contact Mike Foley at [mike@foleylawpractice.com](mailto:mike@foleylawpractice.com) should you be interested in purchasing this service.
